
Cornerstone Building Systems - Licenses/Franchises For S

Cornerstone Building Systems

The Cornerstone Insulated Concrete Form (ICF) wall system, a type of Structural Insulated Panel (SIP), is a well-proven system and offers the following benefits:

- Eco-friendly and energy efficient
- Earthquake and wind resistant
- Easily and speedily erected
- Cost-competitive with standard timber frame construction, whilst also incorporating the building code insulation and bracing requirements

The Cornerstone ThermaflorÂ© (designed in house under copyright by Cornerstone) and the first fully-insulated slab system in New Zealand.

Getting the bones of the building right at the beginning, is so important. The floor, wall systems, and good ceiling insulation are key to ensuring a home will maintain a comfy, ambient temperature with minimal energy inputs.

Cornerstone Building Systems are pioneers in the area of energy-efficient proprietary building products that achieve one of the highest insulation values of any floor and wall building system in the market today, and are able to offer cost-competitive, healthy and safe living environments.
