Is this the best house in the North Island?

Media Releases by New Zealand Green Building Council

02 June 2017

Eco Green Homes Ltd latest design has achieved an independently verified 10-star Home Star Design rating and a 5 star 'Lifemark' rating, the highest design rating in the North Island.

This house is also New Zealand's first house to achieve 10 star out of 10 star on Homestar version 3.

Designed with both the young and old in mind, this futuristic house is a green and ultra-modern. The house incorporates both enhanced daylight using solar powered skylights and clean indoor air using Low VOC paint. Coupled with high wall insulation (R3.8) and German Brand triple glazed windows. this house promises to be a warm, healthy and comfortable home designed to enhance the living quality of its occupants.

The Homestar and Lifemark ratings provide independent recognition of the measures Eco Green Homes Ltd have taken to create a warm, healthy, energy and water efficient home with minimal waste and environmental impact.

Kush Bhargava from Eco Green Homes, says "Our mission is to make green homes affordable to the New Zealand market. In this day and age there is no excuse not to build green. The benefits far outweigh the costs with no compromises on quality or comfort. Ultimately these homes save significant costs in the long run."
